Instruction Manual

Version 1.1

Please read this manual before operating
the SQ-001 (this instruction
manual is based on APPV 2.18)

Content

| | |
|-------------------------|------|
| Safety Statement | P 1 |
| Overview | P 4 |
| Power Adaptor Selection | P 6 |
| Operation | P 7 |
| Soldering Iron Tip | P 15 |
| Trouble Shooting Guide | P 17 |
| Technical Support | P 19 |
| Legal Statements | P 21 |

CAUTION: Failure to comply a CAUTION may cause damage to the product or other equipments.

WARNING: Failure to comply a WARNING may result in serious injury to the user or others.

NOTE: Annotations, operation notes or additional information.

Safety Statement

1. 1 General Safety

- Use only certified power source/adaptors from your region .
(please refer to 3.0 for specifications)
- Do not operate in humid environment.
- Do not operate in inflammable/explosive environment.
- Keep the surface of the product clean and dry.

1. 2 Working condition

| Working condition | Requirements |
|-------------------|--|
| Temperature | Operating Condition: from 0°C to +50°C |
| | Non-operating Condition: from -20°C to +60°C |
| Humidity | Operating Condition: from 40°C to 50 °C, 0% to 60% RH |
| | Operating Condition: from 0°C to 40 °C, 10% to 90% RH |
| | Non-operating Condition: from 40°C to 60°C, 5% to 60%RH |
| | Non-operating Condition : Low temperature: from 0°C to 40°C, 5% to 90%RH |

<2>

1. 3 Warnings

When using SQ-001 ,

Turn the power off when not in use, or left unattended.

When power is ON, tip temperatures will be between 100°C~400°C(212°F~752°F), please be careful.

Please don't operate SQ-001 when it's wet or operate it with wet hands, which will cause an electric shock.

1. 4 Cautions

When using SQ-001 ,

- The handle is constructed with precision, dropping shall be avoided.
- After continuous use up to 40 minutes, the handle surface temperature will reach 50°C~60°C.
- For the first time using, SQ-001 may generate a light smoke due to the heating of heating elements, which is a normal phenomenon.

1. 5 Liability Statement

Any damage of the product, or losses related to the product damage, if it's man-caused, or assumed to be man-caused, the liability will belong to the user.

<3>

Overview

2. 1 Ports and Control Panel Introduction

- 1.The tip setscrew
- 2.Button A
- 3.Button B
- 4.Ground cable fixing screw
- 5.Power connector

- 6.Micro USB
- 7.DC 5525 12-24V port
- 8.Soldering tip port
- 9.Soldering tip connector
- 10.Soldering tip heating end

2. 2 Specifications

| | | |
|------------|----------------|----------------------------------|
| Screen | | OLED |
| USB port | | Micro USB |
| Power port | | DC 5525 |
| Dimensions | Operation unit | Length:97mm, Diameter:16.5mm |
| | Heating unit | Length:76 + 33mm, Diameter:5.5mm |
| Weight | | 30 g(power adaptor not included) |

2. 3 Operation Specifications

| | |
|--|-----------------|
| Power | 65W |
| Temperature range | 100℃~400℃ (max) |
| Temperature stability | ± 2% |
| Operation temperature under heat | 40℃ |
| Soldering tip resistance to the ground | < 2 Ω |

Power Adaptor Selection

Before connecting DC5525(12-24V)power adaptor, check if the adaptor is in good condition as below standard.

We would recommend the DYS404-190210V (19V,2.1A)power supply as an accessory for SQ-001.

<6>

Operation

4. 1 SQ-001 Installation

1. Loosen the tip setscrew, insert the soldering tip connector and tighten the screw;
2. Connect the ground wire to the ground wire setscrew ;
3. Connect the DC connector to SQ-001 , connect the power cord and turn on the power accordingly.

Note: If the screen displays "sen-err" when it's plugged, means the soldering iron tip is not properly fixed, please re-install it properly.

4. 2 Default Settings

| | |
|------------------------------|-------------------|
| Default temperature unit | °C |
| Default temperature | 300°C (Default) |
| Sleep mode temperature | 200°C (Default) |
| Adjustable temperature range | 100°C~400°C (Max) |

<7>

4.3 Basic Control

4.3.1 Screen Display

When plugged into DC 12-24V power adaptor , SQ-001 will display its logo, Version number and its standby screen in sequence .

When plugging into DC 12-24V power adaptor , pressing Button A at the same time will enter DFU mode, "DFU 3.45 " will appear on OLED screen .

To exit DFU mode: unplug and plug in the device again without pressing any button ,then it will enter standby mode.

4.3.2 Automatic Calibration

Press Button B in standby mode to enter the thermometer mode

In thermometer mode, press 2 buttons at the same time to enter the calibration mode

Display shows when calibration is succeed.

Display shows when calibration failed

Long press any button to exit thermometer mode

 Note: Calibration shall be done when SQ-001 in room temperature

4.3.3 Heating up

When pressing Button A in standby mode, SQ-001 will heat up to preset temperature

When OLED displays as picture, means it's ready for soldering

In operation mode, holding both buttons for 3 seconds will return to standby mode

<10>

4.3.4 Temperature Adjustment

In standby mode, press Button A will enter preset temperature

Temperature down: In temperature adjusting mode, hold Button A for at least 2 seconds, until display reads the temperature you want.

Release Button A when display reads the expected temperature, and SQ-001 will automatically adjust to it.

Temperature up: In temperature adjusting mode, hold Button B for at least 2 seconds, until display reads the temperature you want.

Release Button B when display reads the expected temperature, and SQ-001 will automatically adjust to it.

<11>

 **Note:** When screen displays arrow pointing to left or right (◀ or ▶) which means the adjustment has already reached its upper/lower limit temperature, settings will not be saved when power is off

Remark: Maximum temperature: 400°C

Minimum temperature: 100°C

When SQ-001 temperature is stable for 60 seconds, it will automatically enter feedback mode, temperature status will feedback every 5-8 seconds.

The last digit on the right end of the display shows below messages:

Arrows up-heating

arrows down-cooling

horizontal lines - temperature stabilize

4.3.5 Sleep Mode

In operation mode, when leaving SQ-001 for more than 180 seconds (⌚ 3 minutes in Default) will trigger the sleep mode, and temperature will automatically adjust to preset sleep temperature.

When working, SQ-001 will restart to operation mode and temperature will automatically heat up to preset temperature (300°C in Default).

In sleep mode, if it's not being operated for longer than the IDLE_TIME setting, SQ-001 will then enter the standby mode.

Note: IDLE_TIME can be adjusted (⌚ 6 minutes in Default). (Preset minimum IDLE time: 5 minutes)

4.4 System Parameters

| Parameter | Explanation | Default | Adjustable range |
|--------------|---|-------------|----------------------------|
| T_Standby | Standby mode temperature | 200°C | 100°C~400°C |
| T_Work | Operating temperature | 300°C | 100°C~400°C |
| Wait_Time | Time from operation mode to sleep mode | 180 seconds | 60~9999 seconds |
| Idle_Time | Time from sleep mode to standby mode | 360 seconds | 300~9999 seconds |
| T_Step | When preset "1", each step will progress in 1,2,5,25; when preset 2-25, each step will progress according to settings | 10 | 5-25 |
| Turn_Off_v | When operation voltage is lower than default voltage SQ-001 will return to standby mode | 10V | 9-12V |
| TempShowFlag | Temperature unit selection | °C | 0 is °C, 1 is °F |
| ZeroP_Ad | Temperature calibration parameter, SQ-001 automatic adjustment | | No manual setting required |

Notice: Preset parameter(s) will be updated to SQ-001 after saved.

Soldering Iron Tip

5. 1 Changing Soldering Tips

1. Unplug SQ-001 before changing.
2. Loosen the tip setscrew.
3. Pull out the tip, replace with another one.
4. Tighten the screw.

Note: When SQ-001 displays "sen-err", it means the soldering iron tip is not installed properly.

5. 2 Choosing Soldering Iron Tips

Note: Choosing the right tips will help you to work more efficient

5. 3 Soldering Iron Tip Maintenance

- (1) Before switching off, wipe the tip's soldering side with some solder.
- (2) Do not leave the tip in high temperature for long time, which may cause it burn out.
- (3) Do not push too hard while soldering, which will damage the tip.
- (4) Do not use rough material or files to clean the tip.
- (5) If the tip surface is oxidized and makes it hard to apply solder on it, you may use 600~800 grit sandpaper to wipe the tip with Ethanol or Isopropyl alcohol, heat up to 200°C and apply solder immediately to avoid it oxidize again.
- (6) Do not use Flux that contains high chlorine or acid, use only resin based flux.

5. 4 Soldering Iron Tip Lifespan

Soldering iron tips lifespan is related to its maintenance (refer to 5.3) and use intensity.

Trouble Shooting Guide

Problem 1: No Display

Check: If the cable is broken

Check: Is there any data in USB mode

Check: If the screen needs to be replaced

Problem 2: Every time when installing a new tip, the temperature status display random numbers

Means the machine is checking status, which is normal

Problem 3: Soldering iron restart automatically

Check 1: Is it properly plugged into the power source?

Check 2: Is the voltage too low?

(need to be set up in the config file)

Problem 4: Soldering iron is heating up and cooling down simultaneously

Check 1: Is the tip first time in use?

Check 2: Is the power cord in loose or defective contact?

Check 3: Is the tip overheating?

Set the temperature in appropriate level

Check 4: Is the soldering iron clean?

refer to "Soldering iron tip maintenance"

Problem 5: OLED shows "Warning!"

Check 1: Is the SQ-001 overheating?

Is SQ-001 temperature higher than the maximum operation temperature

When temperature is lower than maximum operation temperature, the warning sign will disappear and it will return to operation mode

Problem 6: OLED displays "High-Vt"

Check: Is the voltage too high? (over 24V)

Problem 7: OLED displays "Sen-err"

Check 1: Is the soldering iron installed properly?

Check 2: If check 1 passes, then replace the soldering iron tip

1. Tip temperature is over 400°C
2. The soldering side of the tip is not applied with solder properly
3. Lack of flux during operation
4. Rub the tip against dry or high sulfur sponge or fabric
5. Tip touched organic material like plastic, silicone oil or other chemicals
6. Using impure solder or solder that contains low proportion of tin

Problem 8: The tip doesn't stick to the solder

Problem 9: SQ-001 return to standby mode during operation

Check: Is the voltage lower than default (10V) ?

Wait until voltage recovers, it could work normally when the voltage is over 10V.

Technical Support

7.1 Standard service

One year of warranty will be provided, if the damage was not man-caused.

Please contact your retailer for warranty details.

Tips are consumables, once it's used, no replacement will be provided.

7.2 Default Parameter Setting

Connect SQ-001 to your PC with USB data cord, OLED will display "CONFIG" and means it's in setting mode. Open config.txt file from the USB drive, set the default parameters.

7.3 Firmware Update

1. Visit <https://sequiremall.com> and download the latest SQ-001 firmware to your PC.
2. Connect SQ-001 to your PC with USB data cord, meanwhile, press SQ-001's Button A to enter DFU mode and a "DFU 3.45" notice appears on the screen. A virtual disk with 8 serial numbers will appear on your PC.
3. Copy the hex firmware to the root directory of that disk. When the extension of the firmware changes from "hex" to "rdy", disconnect USB and the firmware is upgraded.

7.4 Changing Boot Up Screen

Create your own 96*16 pixel image save as BMP in single color bitmap

Copy the file to soldering iron's USB drive, change file name to "LOGOIN"

Note: When the "LOGOIN.BMP" exists in the USB drive, the boot up logo will be using the file, if the file doesn't exist, it will be using the default logo instead

Legal Statements

8.1 Disposal

Do not dispose this product with domestic waste

Handling and recycle: Disposal of the product shall be manipulated according to laws and regulations in your area.

8.2 Statement of Fulfilling FCC Standard

This device fulfills part 15 of the FCC regulations. Device must fulfill below 2 conditions:

- (1) Device must not generate interference
- (2) Device must be able to resist any interferences on it, including interferences that could cause dangerous manipulation

8.3 Statement of Fulfilling CE Standard

This is a trademark of Europe Union
This product with CE logo on it fulfills related Euro Union laws and regulations
